Projects:

Breast Cancer Diagnosis Predictor

Python (Scikit-learn, Keras)

A simple Deep Learning (ANN) model trained with real breast cancer data. It can predict outcome for breast cancer diagnosis. Made as a semester assignment.

Property Consultancy Mobile App

JavaScript (React Native)

Built a simple property consultancy mobile app focusing mainly on the UI, with login functionality using Asynchronous Storage.

E-Commerce Website

PHP, MySQL, Bootstrap 5, Azure

Built a production-ready ecommerce store, deployed on Microsoft Azure (out of free trial now).
